MARSHALL ISLANDS PROGRAM RESPONSIBILITIES

The NV reorganization of January 12, 1988, in part, established the Office of Emergency Response and Program Analysis. The assignment of Harry Brown as Deputy Program Manager of that office necessitated a review as to NV's management responsibility for DOE's Marshall Islands Programs.

Although our direct responsibilities are expected to reduce over the next several years, we will continue to run the medical program through BNL for the foreseeable future as part of the agreements contained in P.L. 99-239. It is likely, also, that we will provide technical assistance to the Republic of the Marshall Islands (RMI) with continued environmental assessments and a radiological protection program for returning populations to Rongelap and Bikini.

After an internal review and discussions with John Rudolph, MA, it was determined Harry Brown will continue to serve as Marshall Islands Program Manager overseeing the BNL and LLNL efforts. He will be the principal point of contact for policy matters with our HQ program office, other federal entities, and RMI government.

To provide program transition capability, the Pacific Area Support Office (PASO) will participate more actively in policy meetings, will assume a lead role in the Marshall Islands Planning Group meetings, and will continue to provide policy suggestions to NV through Mr. Brown.

Nick C. Aquilina
